

ALIAS
ONE RIFLE. MANY IDENTITIES.™

ALIAS TARGET™
ALIAS ERGONOMIC CONCEPT:
TOTAL ADJUSTABILITY TO
A SHOOTER'S ANATOMY

Finally, a competition rifle that actually fits.

At first you are struck with this rifle's aggressive looks. Pull it out of the gun case and it draws a crowd at a shooting range. But look closer: this is not a show gun. Every component is there for a reason. This is a gun designed to maximize ergonomics for a top shooter. Everything is adjustable. Everything.

Developed by Rock McMillan with input from world champion high power shooters, the design started as a clean sheet of paper and evolved into a cutting edge rifle that could meet the demands of literally the best competitive shooters in the world.

Buttstock, cheekpiece, forend, sight position, trigger – almost every component of this rifle is fully adjustable so that a shooter can hold exactly the right position across the course of fire. What's more, the components are indexed so the adjustments can be quickly repeated during a match. No matter how your body is built and what position you are shooting, this rifle will fit you.

And what about accuracy? This rifle has already won numerous high power and long range championship events, setting records in the process. The ALIAS Target concept works.

NOT ONLY IS THE TARGET ADJUSTABLE, IT IS EASILY ADJUSTABLE.
